English → Highly Proficient.

French → Highly Proficient.

Deutsch → Basic Knowledge.

INTERSHIPS

I have done Two internships in the summer between 2nd and 3rd year

1. ORIENT EL FUTTAIM :

This was my first internship and it was from July 21th till Aug 20th, 2024. And It was mainly dedicated to the IT Department and I have worked with them on their website and add a new feature to payment methods by doing integration with paymob and by the end of the intern anyone could pay insurance with either visa or paymob so I worked on the front-end which was React and the backend which was Oracle Sql

2. Avidbeam :

Avidbeam is a Software company that work on developing AI-powered video analytics solutions for smart cities, security, and retail, offering real-time applications like facial recognition, vehicle detection, and retail insights.

This was my second internship and it was from Aug 21th till September 20th, 2024. And It was mainly dedicated in the web-Department and I worked as a Full-Stack Software and work on Ruby on Rails Framework in the Back-end and React in the front-end.

Courses

I Have take in the summer between 2nd and 3rd year a course in AI & machine leaning with Samsung innovation campus and done different Machine learning projects with it and also learn some topics From Deep learning like ANN and CNN algorithms which was very important opportunity because Samsung is one of the most popular companies.
